

Declaration of investment costs for photovoltaic systems

Vested benefits account number(s): _____

Mr. Ms. (hereinafter the "account holder")

Social security number:

Last name:

First name:

Street/No.:

Postcode/Town/Country:

Date of birth (dd/mm/yyyy):

Civil status:

Prerequisite for financing photovoltaic systems

Financing photovoltaic systems using assets from your occupational benefits scheme or tied pension provision is only possible

for the part of the system that generates electricity for your own use.

Your photovoltaic system installer must therefore specify how much of the total electricity generated is intended for your own potential use. You can only claim an advance withdrawal for this part after having deducted the cantonal and federal subsidies.

Please complete

Investment costs (after deducting the subsidies)

Share of electricity production for own use as a %

Amount of pension benefits for the photovoltaic system

Note on completing the above information

The above information must be calculated as follows:

- Investment costs (after deducting the subsidies): Investment costs for the installation (information provided by the photovoltaic system installer) minus subsidies (known when building permit is granted)
- Share of electricity production for own use as a %: The share of the total electricity produced by the system that is intended for your own personal use (information on personal use and grid feed-in is provided by the photovoltaic system installer's systems)
- Amount of pension benefits for the photovoltaic system: The maximum possible WEF funding amount is calculated by multiplying the investment costs (after deducting the subsidies) by the share of electricity production for own use as %

The information set out above must be documented by the photovoltaic system installer.
